Dear Mr Weisberg:

1st: enclosed is a money order for the amount of your Frame-Up book; will you please dispatch a copy to:

At this time, I will not have to worry about it's being labeled "do not open ...." You might enclose a flyer about your other books.

As for "Jack Rubenstein" being a common name amongst Jewish people; eg. in 1935, only one is listed in a Chicago telephone directory. In 1950, there is one "JL...," and three "Jack"s. Information for approximately twenty-five years indicates that this was not a very common name in a large city like Chicago. So as to preclude error, however, I did explain to the receiver of the information that there indeed, could be a coincidence of names Rubenstein and that it deserved to be investigated. So, I don't concur with you in believing that such information is counterproductive. It does at least this: gets those senators thinking in uncomfortable and unconventional modes. It surely wasn't "forced" upon them; indeed, after giving enough ~~info~~ key information to the ranking minority member of the Govt Operations Comm., I was pleased to receive a note from him saying that he would share all that I have sent with other members of the committee and sub-committees (the friends and trustworthy ones, that is.) He saw some sense to yours and others' writing.

As for the "official" communication regarding Nixon's office and JLR, the holder of it also suspects it of being a plant and a fake.

Even if it were genuine, I would hesitate to pass it on to the Senate for the reason that it could ~~prejudice~~ engender a depressive feeling and prejudice interest in getting into another "can of worms" investigation.

Further, even if the HUAC Jack Rubenstein is another person, it shows the FBI up for not giving this information to the Warren Comm; for sure, it was aware of him as was HUAC. That in itself is very important.

If there is something you did not include in publishing, for one reason or another, and you wish it to be noticed, I have a pipeline past staff people - right to Percy's and Church's own desks. It is a good idea that this ~~is not po~~ does not "get around". Things are being studied quietly at homes and in closed offices devoid of harassing journalists (newspaper people & TV people)

If anyone should call you in the future, just be cooperative and your usual friendly self. A caution, though (if you please): moderate strong passions and be quietly logical. It's enough that these senators should have new found doubts and subsequent upset emotions themselves.

Conversational gossip: I know what your expressed attitude toward the "Tramps" photos is, but are you aware that there is one little publicized one where a police officer is wearing an earphone in his right side ear with a wire running into his shirt ~~or~~ collar - just like a typical SS person does? (not to make any allegations about the SS)? What he was wearing was non-standard equipment, at least; if you get around in a large city frequently, you'll know this.
Some enclosed ~~here~~ articles:

Very truly yours,

Bruce Kurck
